

Major users of animals
for scientific purposes in the

EU

6,131,243* animals used in research, testing and education

73%

I am **very concerned** about the use of animals in scientific research, testing, and education.

76%

More needs to be done to accelerate the full replacement of animal experiments.

77%

The European Commission and its Member States should develop a coordinated strategy to transition to scientific research, testing, and education **without the use of animals.**

75%

The European Union **should be a global leader** in moving towards science and innovation **without the use of animals.**
